

At J & D Corvette , we are fiberglass specialists. All of the parts we sell are manufactured by us at our facility in Downey, California. We have over years of experience in making hand laminated fiberglass products, and our workmanship is the finest available in the United States today. With our California location, we can offer you significant savings on shipping to the western U.S. or to the Pacific Rim.

We have our own full service Corvette body shop, and our expert Corvette body men fit every part of an actual Corvette before it is put into production. We supply hundreds of body shops in Southern California with Corvette parts, and they demand parts that fit. In addition to the front end components shown here, we can custom make any section of the front end that you need. Mail or fax us a sketch with the exact dimensions, and we will quote you a price to make it.

Our Reproduction 1984-1996 Hoods are The Finest in the Industry. Please Compare Our Quality and Pricing.

Racers and High Performance Enthusiasts Please Note:

Through our own Racing , we Have Learned That The Most Cost Effective Way to Make Your Corvette Accelerate, Brake and Corner Faster is to Reduce Weight.

We Can Supply any of Our Body Panels In Either Light Weight Fiberglass or Carbon Fiber Construction. A Good Example is Our 1985-1996 Hood. A Stock Hood Weighs 81 Pounds. Our Carbon Fiber Version Weighs 27 Pounds. Please Call for Pricing.

FIBERGLASS & FLEX-FIBERGLASS BUMPERS

Our Bumpers Are Now Available In Two Materials, Our Traditional Fiberglass and Flex-Fiberglass. Flex-Fiberglass Uses A New, More Flexible Resin. While Less Flexible Than the Original Molded Urethane Bumpers, Flex-Fiberglass Parts are More Flexible than Our Traditional Fiberglass Parts, While Maintaining All Their Good Qualities and Cost Effectiveness.
